GPS SETUP MADE EASY

1

Download the Cykelabonnement app from the App Store (iOS) or Google Play (Android). Please make sure you download the latest available version.

2

Create your account using the email address linked to your subscription. Then choose a secure password.

3

Confirm your email address: After signing up, you will receive a welcome email from PowUnity containing a link to verify your email. Click the link to complete the registration.

4

Accept the invitation: You will then receive an invitation email from PowUnity/Biketrax. Follow the link in the email and log in with the account you created in Step 2.

5

Your device is now active and ready to use – no further setup is required.

6

Start tracking your cargo bike: Once registered and connected, you can follow your cargo bike directly on the map in the Cykelabonnement app.

Features in the App

Battery Status

Check your GPS battery level directly in the app. It is important to keep the battery above 20% to ensure stable tracking. The GPS device charges automatically every time you ride your cargo bike.

Live tracking

See your bike's location in real time.

Movement Alarm

Get notified if your cargo bike is moved.

Support & Troubleshooting

Need help? The PowUnity support team is ready to assist you. Contact PowUnity directly at support@powunity.com or visit their website at powunity.com/support.

Limitations

GPS data is indicative and may be affected by network disruptions.

Check battery level
